DETAILED ACTION

1. In the preliminary amendment filed January 7, 2005, claims 1-11 and 28-36 have been amended, claims 12-27 and 37-45 have been cancelled, and new 46-47 have been added. Therefore, claims 1-11, 28-36, 46 and 47 are pending.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-11 and 28-35, 46 and 47, drawn to an isolated polypeptide belonging to the aspartic acid protease family having a peptide sequence of SEQ ID NO:6, 16, 25 or 27; a cosmetic or pharmaceutical composition comprising the polypeptide of SEQ ID NO:1, 4-9, 16, 25 or 27 or homolog thereof; and a method for combating skin conditions associated with a dysfunction of cell proliferation and/or differentiation, or a method for treating dermatological infection, comprising applying or administering the polypeptide.

Group II, claim 36, drawn to a polyclonal or monoclonal antibody, which specifically recognizes a polypeptide of SEQ ID NO:5, 6, 16, 25 or 27.

Should Group I be elected, applicant is required to select "one" polypeptide sequence from claim 1, 7 or 28 (SEQ ID NO: 1, 4-9, 16, 25 or 27). Each peptide, which contains different amino acid sequence, is patentably distinct. This is not species election.

Should Group II be elected, applicant is required to select "one" polypeptide sequence from claim 36 (SEQ ID NO: 5, 6, 16, 25 or 27). Each peptide, which contains different amino acid sequence and is specifically recognized by an antibody, is patentably distinct. This is not species election.

The claims of these groups are directed to different inventions, which are not linked to form a single general concept. The claims in the different groups do not have in common the same or corresponding technical features. In particular, each group is directed to structurally and functionally distinct chemical entities (e.g., polypeptide and antibody) and/or methods which use different materials and produce different effects. Accordingly, the claims are not so linked by a special technical feature within the meaning of PCT Rule 13.2 so as to form a single inventive concept and lack of unity is deemed proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
